

BURTON JAMES

GLOSSARY OF FABRIC TERMS

Double Rubs - A double rub is a measurement of a fabric's resistance to surface abrasion (or wear) – High Double Rubs or DRs help extend the life of a fabric.

Less than 3,000 DR = Best for curtains, drapes, and decorative pillows.

3,000-9,000 DR = Best for a formal dining room that doesn't see much use.

9,000-15,000 DR = Residential furniture that will see regular use. Living or family room.

15,000-30,000 DR= Minimum number of double rubs for commercial upholstery. Over

30,000 DR = Suitable fabric for furniture in an airport, movie theater, restaurant or commercial facility with heavy traffic.

Double rub measurements are determined by a mechanized test called the Wyzenbeek Method.

Fabric Cleaning Codes -

W: Water-Based cleaning agents or foam may be used. Use distilled water as tap water contains minerals that may cause fading.

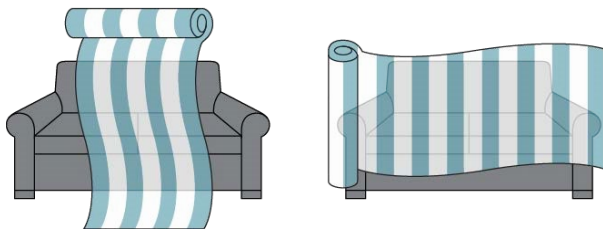

S: Only mild, water-free cleaning solvents should be used. Never use water.

W/S: Water-based cleaning agents, foam or mild water-free cleaning solvents may be used. Never use tap water. Use distilled waters as tap water contains minerals that may cause fading. **X:** Clean only by vacuuming or light brushing to remove overall soil. Never use water, foam or liquid cleaning agents.

Fabric Orientation -

Up the Bolt: The pattern flows from top to bottom up the roll. **Railroaded:**

Pattern runs across the roll instead of up the roll.

Fabric Repeat - The distance between the start and repeat of a pattern on a fabric.

Soap & Water Cleanable - Can be cleaned with soap & water solution without damaging the fabric.

Bleach Cleanable Can be cleaned with a bleach solution without damaging the fabric.

Stain Resistant -

Resists typical household stains or marks by preventing them from penetrating the fabric permanently.

Liquid Resistant - Prevents liquids from penetrating or damaging the fabrics. Liquids may sit on the surface or pass thru without soaking into the yarns & fibers making up the fabric. This helps prevent stains from becoming permanent thus making the fabric easier to clean.

Fade Resistant - Enhances the time the color stays true by delaying the fading of color from UV rays.

Quick Dry- Fabric does not absorb liquids allowing it to dry in a timely manner.

Anti-Mildew - Fabric has properties which prevent the development of mildew.

Made in the USA- This product supports American craftsmanship and is manufactured in the USA.

Eco-Friendly- This product is created with eco-friendly materials and processes.

PFAS Free- No PFAS (polyfluorinated chemicals) are used in manufacturing this product which enhances its eco-friendly make-up.
